SENATOR SAVAGE: The Legislature will come to order and we have seven more hours of tape Senator Anderson so continue.

SENATOR ANDERSON: Mr. President, I do not need that much time, I think simply to summarize what I have been saying is that this is a piece of legislation that I do not regard as a more lenient piece of legislation it is simply a piece of legislation that allows everyone concerned to know what they are doing and to know exactly what the sentence is going to be and know exactly when they are going to get out when they behave and when they are going to get out if they do not behave. The many concerns that have arisen as a result of the bill, I think that many of us have sat down and spend hours with Mr. Neal and the Parole Board. We have gone through these cases and we found out that in most cases the person involved would have lost good time and would not have gotten out under any circumstances, there are all kinds of other things that were not brought out in the original concern, so I think that the bill is good and it is right. I think that it is going to make a very dramatic improvement in the situation as far as the department of corrections control with the inmates concerned. I move the advancement of the bill.

SENATOR SAVAGE: Question is to advance LB567 as amended to E & R initial. Please vote. Record.
